

BenQ Multi Touch Displays Calibration

Get interactive with your class today!

If the touch screen does not work well, perform the calibration.

Download the Calibration Software and user guide from the following Internet links.

For Windows operating system: [Touch screen calibration for win.html](#)

For Mac operating systems: [Touch screen calibration for mac.html](#)

The Touch Screen Calibration enables users to calibrate 2550 and ProfileTouch 2S (5200) touch screens. The Touch Screen Calibration Utility will work with 2550 and ProfileTouch 2S (5200) firmware versions 6.3.5 and above.
