GoGet

MAKING MEETINGS WORK™

GoGet's award winning range of meeting room display systems set the standard for easy to use room scheduling and help millions of users every day to overcome the all too familiar issues related to meeting room management.

No Room for Confusion
Take control of your meeting room reservations and make an impact on employees and visitors with GoGet's sleek and professional touch displays and wayfinding solutions installed in your office locations. With GoGet, there is no room for confusion.

ALL YOU NEED IN ONE BOX

The Room Sync series is GoGets's range of professional meeting room display systems. Manage room bookings via e.g. Outlook or the sleek touch-screens outside each meeting room, and present a wide range of customized information including availability, organizer, title and upcoming events.

GoGet displays are available in two versions; Room Sync (7") and Room Sync Plus LED (11.6") and both come with Room Display 6, central administration and room analytics included.

Easy to Use - Easy to Manage
GoGet's latest product range takes professional meeting room booking to an unprecedented level when it comes to design and features, while still enacting GoGet's core value of "keeping it simple" for both users and admins.

EASY MEETING FINDING

Enhance and supplement your room display system even further, by adding Room Finder – our wayfinding system for meeting rooms.

Room Finder is a professional, modern and cost-effective wayfinder solution ideal for offices with multiple meeting rooms. It displays easy-to-read meeting room information and directions for all visitors and meeting attendees on LED-TVs in reception areas, lobbies and other office areas.

ROOM DISPLAY 6 SELECTED FEATURES

Syncs with Existing Systems
Built-in support for the most modern and used e-mail calendar systems; Exchange, Office 365 and G-Suite.

Central Administration
Manage all devices from one central location via the secure, scalable web-based admin console at roomdisplaycenter.com.

Add a Company Profile
You can customize the background image, add your company logo or brand ID colors in order to maintain brand consistency.

Check-in with Host Reminder
If activated, users have to manually check into meetings within a specified time range. Optionally, hosts will receive a mail notification when a meeting check-in is due.

Find and Book Free Rooms
With the new amenities filtering functions, you can easily find and manage bookings for other rooms inte the office, right on the display.

Stop the Room Thieves
Users can lock their on-screen reservations by entering a one-time PIN code (OTP), which can only be edited or removed by using the OTP or admin password.

Reporting & Services
See room-specific details, like seat number and equipment. Send error reports of said equipment or order e.g. catering, right at the display.*
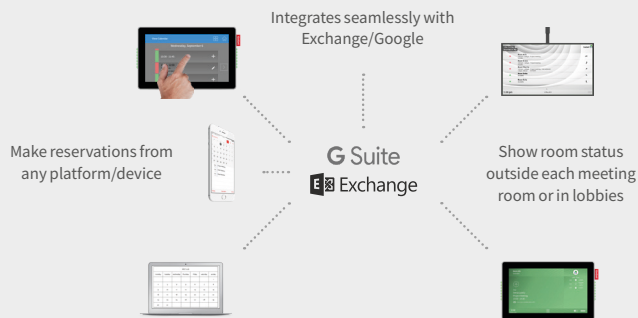

Smart Room Analytics
Our new smart analytics and reporting functions can help you with room KPIs and decision support so that you can use your resources more wisely.

GoGet

THE ROOM DISPLAY ECO-SYSTEM

Take control of your meeting room reservations by using your existing calendar systems and improve and streamline your work-flow. Since no additional server software, add-ins or plug-ins are needed, you can make reservations from any mobile device, on-screen, outside the rooms or via a computer.

In order to comply with strict user integrity policies, the devices communicate calendar data directly with the email calendar source – not through any other component of the Room Display Eco-system including the Room Display Center. The Room Display software benefits from running on the world's most used OS platform – Android.

Integrates seamlessly with Exchange/Google

Make reservations from any platform/device
